1600
Index-training observations
300 paired replications per setting; bars show one Monte Carlo standard error.
Stein screened/refit
One dense MAVE update
Iterated dense MAVE (cap 200)
MAVE selection + RRR refit
One sparse update + RRR refit
Stein threshold + RRR refit (C=1)
Stein threshold + RRR refit (C=1.5)
True-support RRR (infeasible)
